

## PROFESSIONAL EXPERIENCE

---

### University of North Carolina, Chapel Hill

Tenure-Track Assistant Professor, School of Data Science and Society

Chapel Hill, NC, USA

2024–Current

## EDUCATION

---

### University of California, Los Angeles

Ph.D. in Computer Science, Advisor: Quanquan Gu, GPA: 3.94 / 4.00

Los Angeles, CA, USA

2019–2024

### University of California, Los Angeles

M.Sc. in Computer Science, Advisor: Quanquan Gu, GPA: 3.94 / 4.00

Los Angeles, CA, USA

2019–2022

### Tsinghua University

B.E. in Automation, GPA: 3.86/4.00, Rank 6 / 150

Beijing, China

2015–2019

## RESEARCH INTEREST

---

- **Reinforcement Learning:** Markov decision process, Sample efficiency, Representation Learning, Uncertainty in RL
- **AI for Science:** Molecule prediction/generation, Epidemic models, Multi-Modal Models (Diffusion Models, LLMs)

## PROJECTS

---

### Molecule Property Prediction using Large Language Model

- Research project during the 2023 internship in NVIDIA RAPIDS team, mentor Dr. Xiaoyun Wang, Dr. Joe Eaton
- Design multi-modal large language model (LLMs) predicting the molecule property given the structural information.
- Collect, clean and augment the molecule annotations using large language model
- Fuse the molecular graph information and SMILES information using Q-Formers
- Provide quantitative evaluation and superior performance on several downstream molecule property predictions tasks.
- Accepted by NeurIPS 2023 Workshop on New Frontiers of AI for Drug Discovery and Development

### 3D Structured Molecule Generation with Equivariant Diffusion Models

- Continue project after NVIDIA internship with Dr. Xiaoyun Wang et. al..
- Using equivariant diffusion models for position generation and discrete diffusion models for atom type generation.
- Introducing the atom neutralization method which improves the molecule stability from  $\sim 90\% \rightarrow 95\%$
- Presented at [Nvidia GTC 2023: 3D Molecule Generation with the Equivariant Score-Based Diffusion Process](#)
- Accepted by ICML 2023 Workshop on Structured Probabilistic Inference & Generative Modeling

### Molecule Property Prediction with 3D Structured Data and Graph Neural Networks

- Research project 2022 during the internship in NVIDIA RAPIDS team, mentor Dr. Xiaoyun Wang, Dr. Joe Eaton
- Using Contrastive Learning to learn the graph representation of 3D structured data with Equivariant Transformers
- Apply methods (Laplacian Embedding, Self-attention Pooling, Dropout, etc.) to improve the scalability of the GNNs
- Improve 50% by contrastive learning compared with baseline model (accuracy (MAE) 0.0156  $\rightarrow$  0.0144)

## AI-based Categorization to Decipher Reaction Mechanisms from Cyclic Voltammetry

- Launched the project in August 2021 Predict the Cyclic Voltammetry mechanism using deep learning.
- Interdisciplinary project with Prof. Chong Liu in Dept. of Chem. at UCLA, supported by [NSF#2140762](#).
- Use deep neural networks (transformer, ResNet, etc.) with problem-specific data augmentation methods.
- Achieve  $\geq 95\%$  accuracy on simulation data, and  $\geq 80\%$  accuracy on real-world experimental data.
- Published at ACS Measurement Science Au, follow up with a more complex cyclic voltammetry detection task, supported by [NSF#2247426](#).

## Combating COVID-19 using machine learning

<https://covid19.uclaml.org>

- Launched the project in March 2020 to (1) help people stay informed about the spread of coronavirus by creating data visualization of confirmed, dead, and hospitalized cases of COVID-19; and (2) provide guidance to policy makers and individuals by using a machine learning empowered epidemic model to forecast the spread of the epidemic.
- Applied Gradient Descent to the SuEIR model to simulate the spread of epidemic. Applied graph knowledge to gain information for the relationship between states and counties in the United States.
- Used in the official forecast by [US Centers for Disease Control and Prevention \(CDC\)](#), [California Department of Public Health \(CDPH\)](#), [The US COVID-19 Forecast Hub](#), [German and Polish COVID-19 Forecast Hub](#).
- Media coverage: [UCLA Newsroom](#), [FiveThirtyEight](#), [TPM](#), [POLITICO](#), [CBS News 8](#), [New Yorker](#).

## SCHOLARSHIPS AND AWARDS

---

• UCLA Dissertation Year Fellowship	2023
• Doctoral Student Fellowships, Amazon Fellow	2021
• UCLA Summer Mentored Research Fellowship	2021
• Tsinghua University Excellent Undergraduate, Class of 2019	2019
• Qualcomm Scholarship	2017–2018
• Finalist in Mathematical Contests in Modeling (MCM)	2017
• China National Scholarship	2016
• Tsinghua Scholarship for Social Practicing	2016
• Tsinghua Scholarship for [Science and Technology Innovation, Academic Excellence]	2016–2019
• Tsinghua Outstanding Freshmen Scholarship	2015
• Golden Prize for Chinese Physics Olympiad (CPHO)	2014

## RESEARCH EXPERIENCE

---

<b>Research Internship</b> NVIDIA Corporation, RAPIDS-cuGraph team	Santa Clara, CA, USA Summer 2023
<b>Research Internship</b> NVIDIA Corporation, RAPIDS-cuGraph team	Los Angeles, CA, USA Summer 2022
<b>Doctoral Student Fellow</b> Amazon Science Hub For Humanity and Artificial Intelligence at UCLA	Los Angeles, CA, USA Winter 2022 - Winter 2023
<b>Research Assistant</b> Statistical Machine Learning Lab, University of California, Los Angeles	Los Angeles, CA, USA Fall 2019 - Spring 2024

<b>Research Assistant</b> Institute for Artificial Intelligence, Tsinghua University	Beijing, China Fall 2018 - Summer 2019
<b>Research Internship</b> Liveness Computer Vision Group, Face++, Megvii Tech. Co. Ltd.	Beijing, China Fall 2019 - Winter 2019
<b>Research Assistant</b> Center for Visual Computing, University of California, San Diego	La Jolla, CA, USA Summer 2018
<b>Research Assistant</b> National Research Center for Information Science and Technology, Tsinghua University	Beijing, China Fall 2016 - Summer 2018

## TEACHING

---

- **Teaching Assistant** at University of California, Los Angeles Spring 2021, Fall 2021  
Introductory Digital Design Laboratory (CS M152A) ([Course Website 21F](#), [Course Website 21S](#))
- **Teaching Assistant** at University of California, Los Angeles Winter 2022, Winter 2023  
Fundamentals of Artificial Intelligence (CS 161) ([Course Website 22W](#), [Course Website 23W](#))

## PROFESSIONAL SERVICES

---

- Conference Reviewer 2019–Current  
ICML[2020-2023], NeurIPS[2020-2023], AAAI[2020-2023], AISTATS[2020-2023], ICLR[2019-2022], IJCAI[2020-2023]
- Journal Reviewer 2019–Current  
PLOS ONE, JAIR, TMLR

## SKILLS

---

- **Programming:** **Fluent** in Python and MATLAB, **Basic** C++, Java, JS, HTML, etc..
- **Machine Learning:** **Fluent** PyTorch framework (Huggingface, PyTorch Geometric)
- **Miscellaneous:** \*nix shell, website construction, git, L<sup>A</sup>T<sub>E</sub>X. CI/CD (This CV and my homepage is CI/CD'ed)
